- **JAVA-IP-FINDER**  
<https://github.com/GOBINDA033/Java-IP-Finder>

This Java project allows users to find and display the IP address of a given website URLs. It uses Java's networking classes from the java.net package (like InetAddress) to resolve a domain name (e.g., www.google.com or www.github.com) into its corresponding IP address. The result is displayed in a simple GUI message box using
